We can help our customers with all their needs from suggestions and ideas on specific needs to follow up and back up service and advice. We can visit your property and measure it up, show you where and explain what your options are. Prepare a computerised plan of your irrigation system and give you a full and comprehensive quote down to the last roll of thread tape at no charge.

We can provide ongoing assistance and support should you wish to install the system yourself or we can install the system to ensure a quick and hassle free introduction.

We can also provide you with back up service, supplies and advice for the months and years ahead.

Let us take the guess work out of your irrigation, get it right the first time.

We can also carry out repairs on most pumps. Don't muck around waiting for a back yard repair job, we are a Davey Master Dealer, we have first preference in this area and warranty repairs are a breeze.
